CHAPTER 1

INTRODUCTION

In recent past, the world has been accelerating at an unprecedented pace. Technological advancements indigitization and new technologies such as staking, DEX, artificial intelligence, blockchain, Web3, virtual reality, and the metaverse are shaping a new world, rich with new opportunities and business models that are disrupting the archaic centralized economy and financial service industry.

These new technologies have demonstrated the potential to replace the centralized financial institutions as we know today. They offer a system that is fair, democratized, and one that applies the same, or even a greater, level of integrity currently being endorsed by mainstream financial corporations.

1. Disclaimer

This whitepaper lays out the motivation, philosophy, Tokenomics, technological approach, and roadmap for PROLabs Eco-system and White Label System.

As a technical whitepaper, its purpose is to provide a comprehensive introduction about ExChainPRO (ECPRO). It does not intend to, or attempt to, define the current status of the technology as described. Nor does it provide an assurance of the successful outcome of the development plan described.

Under so far permissible law, PROLabs rejects that this whitepaper by any binding agreement between the paper's producers and its consumers.

PROLabs is not responsible for any losses or damages that occur because of any act undertaken by any individual, Company or group as a result of consuming the contents of this whitepaper.

PROLabs reserves the right to modify and update this whitepaper in the light of better information, improvements in technology and development, or shifts in the economy.

2. Market Overview

2.1. Cryptocurrency and Token Market are Growing Rapidly

The global cryptocurrency market size was valued at \$1.49 billion in 2020, and is projected to reach \$4.94 trillion by 2030, growing at a CAGR at 42.8% from 2021 to 2030. There are more than 19,000 cryptocurrencies in existence and dozens of budding blockchain platforms that exist. A blockchain platform, such as Ethereum, is the underlying technology that many of these different cryptocurrencies are built upon.

2.2. Liquidity Pooling

More specifically, the TVL, or total value locked up in the liquidity pool, has reached approximately 100 billion USD. Nevertheless, these amounts are a tiny fraction of the global financial service industry, whose value is estimated to be north of 20 trillion USD. The growth potential in DeFi in the long term is comparable to the value of Amazon and Google in the late nineties. Multiple DeFi solutions beat the market's volatility, as they persistently provide significantly higher returns than leaving the funds sitting in the retail banks' accounts that pay around 0.25% APY.

2.3. NFT Market

It has been estimated that the NFT market was valued somewhere between 16 and 40 billion USD. In 2021 alone, the NFT market experienced tremendous exponential growth, calculated at more than 210 times the value of 2020. Every week more than 15 million USD of NFTs are being sold. On average, NFT prices are below 200 USD, but specific, very successful collections are traded daily for. The concept behind NFT was created in 2014, but only since last year has the broad population started to realize its real value as digital proof of ownership of assets. It is not a secret that NFTs are being investigated by many large corporations and beginning to be incorporated into their business models and operations.

3. PROLabs Vision and GOAL

Blockchain and decentralized systems are constantly disrupting the traditional way of doing business. Blockchain has found a way to improve current business models and created countless ways to utilize these spaces.

VISION

PROLabs aim to establish an entire ecosystem of platforms and usher the users to explore new avenues of investing their money.

PROLabs also render each user the option to become internal shareholder, and share up to 80% of the revenue. Our Vision is also to create a household name appealing to the masses.

GOAL

Our goal is to create a system of value for all the members of our community and the holders of ECPRO Token, with utilities that continuously add value to our ecosystem and disrupt the crypto space in a very positive way. PROLabs Exchange's primary goal is to have 100,000 affiliate members and 1 million exchange users.

2

CHAPTER 2

TECHNICAL OVERVIEW

PROLabs Eco-System implement the first White Label system. This applies protocol against scalability and regularity issues and, at the same time, improves the processing speed and time.

4. PROLabs Protocol

4.1. Governance protocol

PROLabs is a community share-based company, which means shareholders will be able to participate in the judicial process of making decisions in the ECO-System. This includes all modifications on contract specifications; add/drop features and functions; and even corporate decisions such as the supporting hard forks of tokens or Blockchain. Every shareholder has the equal rights. However, users with more shares, will have a bigger influence on the decision-making process. The voting start when the decentralized wallet app is finish.

4.2. Security protocol

Security is of paramount importance to PROLabs. We implement a mix of custodial and noncustodial wallet solutions, depending on service offerings. When custody is required for specific services, we will leverage an industry-grade security solution that employs the strongest encryption technology available, to prevent the possibility of malicious attacks. Nonetheless, token purchasers will be able to use non-custodial solutions to hold tokens given to them in order to provide them complete control over their digital assets. Given our emphasis on security, we will primarily focus on offering non-custodial services for initial staking through Delegated Proof of Stake (DPoS) tokens. By doing this, we will be able to mitigate security risks substantially as we will not directly handle digital assets. Tokens that are offered as Proof of Stake (PoS) will be maintained through industry-leading security protocols and smart contracts.

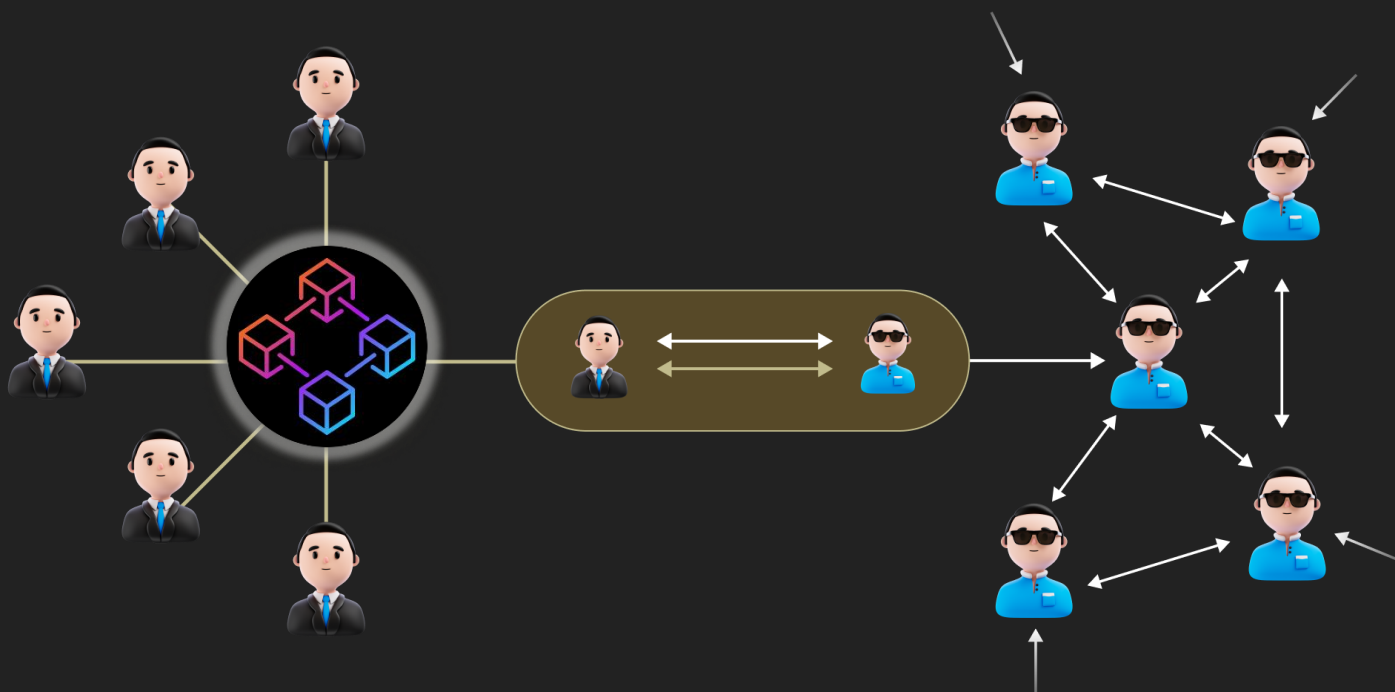

- 2 Factor Authentication
- End-to-End Encryption
- DDoS Migration
- SSL Encryption
- HTTPS Authentication
- Multisignature Vault
- Escrow Management
- CSRF Protection
- Data Management and Encryption
- Highly secure multi-crypto wallet
- Audit reports

5. C-DEX

WHAT IS C-DEX

C-DEX stands for Centralized platform with Decentralized applications

TECHNICAL ARCHITECTURE

We use the Centralized part of ExChainPRO to secure an extra layer of security, as login, unstake function, access the trading, IDO/IEO LaunchPAD, Airdrops, and KYC. After the user logs in to the Centralized part of ExChainPRO dashboard, the users then have the option to connect their crypto wallet and gain access to the Decentralized part of ExChainPRO, meaning the users will be allowed to trade, convert, and much more, directly on the Blockchain between other users with their own private crypto wallet, 100% controlled by smart contracts on the Blockchain. In other words, the users' Money stays in their own private wallet, which they control.

6. Products and applications overview

The PROLabs ECO-System will offer a complete pool of dApps, products and services.

DEX

A DEX enables the efficient exchange of multiple crypto asset pairs with minimal KYC requirements. The trading pairs will cover the major stablecoins like USDT and the native ECPRO/SPRO coin/token. The transaction fee will be as low as 0.25% per transaction.

CEX light

A CEX enables the efficient exchange of multiple crypto asset pairs with KYC requirements. The trading pairs will cover the major stable coins like USDT, BUSD, USDC and the native PPRO coin/token. The transaction fee will be as low as 0.25% per transaction.

Affiliate system

PROLabs allow users to buy internal shares in the company where affiliate on a weekly basic share up to 80% revenue from the company. User also gets their own referral link and can build up a business income based on activity fees and commission.

NFT Marketplace

A NFT Marketplace is a gateway for users to mint, P2P trade, explore, and exchange NFTs. These NFTs can be in the form of digital identity ownership of digital art pieces, such as paintings, 3D video graphics, collectible items, metaverse avatars, and digital audio files.

IDO/IEO LaunchPAD

An IDO/IEO LaunchPad is a system to let users participate in the initial crowdfunding fundraising steps to raise digital capital and liquidity for a new blockchain project with a dedicated utility token that is not yet listed on the open market.

Staking

Everyone with ECPRO or SPRO Tokens/Coins can stake on the normal staking protocol or users can choose the Power Staking option from StakePRO platform. The staking is 100% Decentralized.

Boosters

Boosters are financial instruments leveraged by SmartChainPRO where users hold their NFTs for a sustained period of time. In return they'd get a predefined extra staking power in the total staking pool.

Escrow

Escrows are Smart Contracts meant to act as an unbiased custodian that would receive and disburse money, NFTs and/or NFT Boosters, to the buyer and sellers of the instruments, with the disbursement dependent on conditions agreed to, by both, the buyers as well the sellers.

Rewards

The users stand to get rewarded for spending their SPRO on Blockchain transaction. The rewards will be granted in terms of the ShopPRO tokens. Users would be able to exchange those ShopPRO tokens for exclusive coupons discount, the coupons can be redeem at the respective business who offered the discount.

7. Eco-System overview and partners

Eco-system

Partners

| | | | |
|--|---|--|---|
|  Binance |  Coinmarketcap |  Blockchain |  Coinbase |
|  Wazirx |  Crex24 |  Metamask |  Helpkidz Coin |
|  Ehstoken |  Hezetoken |  Vermilcoin |  Txbitcoin |
|  HolyCoin |  Bowlacoin |  Cotey World Wide |  Product |

8. Tokenomics

Building an open and deflationary Tokenomics design is an essential component of building market and users' confidence. This is the strategy that the PROLabs is committed to.

The PROLabs Eco-system supports 3

1. ECPRO (Used for ExChainPRO trading fee and products)
2. LPRO (Used for decentralized LP)
3. EPRO (ShopPRO Rewards Tokens are used in the discount eCommerce portal)

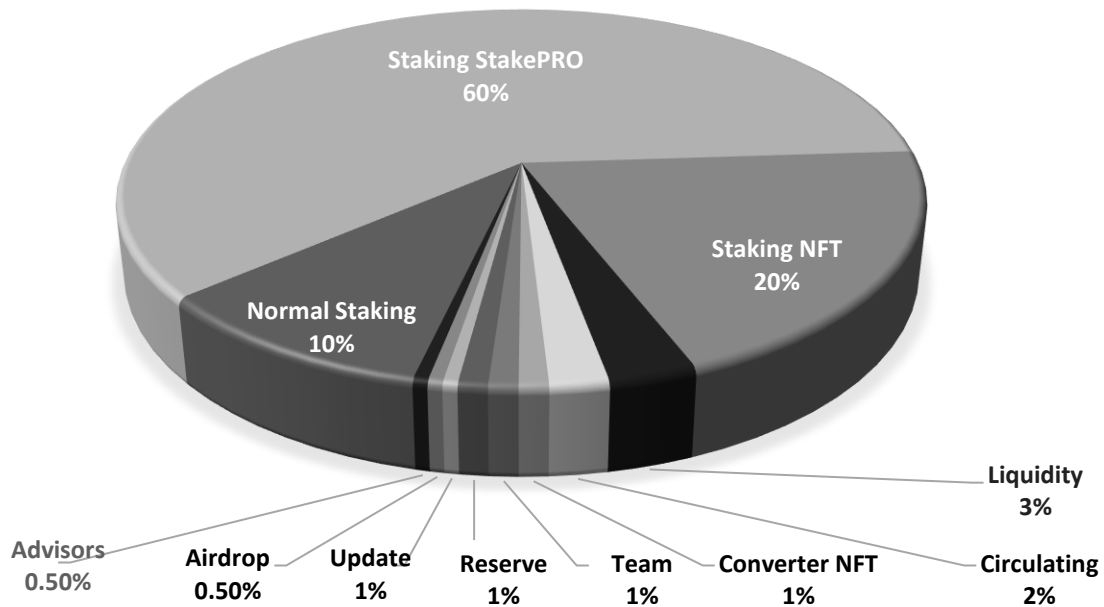

This section presents PROLab's Tokenomics to provide full visibility over how utility Token flow within the ecosystem. It details how the ecosystem responds to inflationary pressures and incentivizes stability and growth of the ecosystem.

A robust ecosystem built on solid Tokenomics has several virtuous characteristics:

- **The utility Token and coin is integral to the ecosystem's function.**
- **The ecosystem protects itself from inflation (limited supply only)**
- **The coins/token is easy to transfer wallet to wallet without any central control.**
- **The coin/token has multiple utilities; e.g., track value when staked or held, can be used for fees, etc.**
- **Full transparency over coin/token functionality.**

8.1 ECPRO Token Allocation

Token Economy

| | |
|--------------------|--|
| TOKEN CONTRACT | 0x5a80CCd354d31992bCf28c66553C447096BdC145 |
| Token main net | BNB Smart Chain (BEP20) / SmartChainPRO |
| Max supply | 100.000.000 ECPRO |
| Locked for Staking | 90.000.000 ECPRO |
| Smart Contract | Decentralized |
| Withdrawal fee | 5% |
| Audit Report | Yes – Verified by CoinSult |

Minting RoadMAP for ECPRO

| | | |
|-----------------------------|--|-------------|
| Normal staking | 10.000.000 ECPRO | Minted |
| To owner wallet | 5.000.000 ECPRO (Airdrop, Team, advisor, ect...) | Minted |
| NFT Staking Silver/Platinum | 20.000.000 ECPRO | Juli 2024 |
| PPRO Converter NFT | 5.000.000 ECPRO | Juli 2024 |
| StakePRO Protocol | 60.000.000 ECPRO | When finish |

3

CHAPTER 3

CHALLENGES AND CORE ISSUES

Blockchain, NFT, Metaverse, Crypto wallet and much more, is for many new users a complete jungle with new words and terms. Blockchain's biggest USP is to create "Trust" between users that may have no pre-existing relationship or point of contact. In fact, the need for trust by enforcing honesty in the system will in the future remove any centralized authority.

9. Blockchain Challenges

The utility of blockchain has been restrained by real-world challenges such as transaction speed. Consider that, when a customer purchases with a Visa card, Visa is the only entity that needs to create a permanent record of this to enable the initial transaction. Contrastingly, blockchain provides a "distributed ledger," i.e., a permanent record that is widely shared.

The upside to distributed ledger technology (DLT) is that it provides "inclusive accountability." While Visa's transactions are managed by the central authority that is Visa; a blockchain enables anyone with the technology and an internet connection to ensure the system's integrity.

The downside is that this decentralization consumes time. Early-generation blockchains such as Bitcoin can process around five transactions per second, whereas Visa can achieve more than 1,500 transactions per second.

SmartChainPRO aims to resolve the aforementioned issues by furnishing a Blockchain powered platform that is secure, promises high transaction throughput, and ensures the inclusion of the community as a whole.

| Cryptocurrency | Transaction per second | Average Transaction Confirmation Time |
|----------------|------------------------|---------------------------------------|
| SPRO | 5000 | 2-5 s |
| Bitcoin | 3-7 | 60 min |
| Ether | 15-25 | 6 min |
| XRP | 1500 | 4 s |
| Bitcoin Cash | 61 | 60 min |
| Lumen | 1000 | 2-5 s |
| Litecoin | 56 | 30 min |
| Monero | 4 | 4 |
| IOTA | 1500 | 2 min |
| Dash | 10-28 | 15 min |

10. Core Issues

PAYMENT INFORMATION AND PHISHING

We'll start with common problems such as plain old theft. Presuming that you're transferring money to a friend. You copy his wallet address accurately, but malware manipulate the address in the clipboard with another one. Not every user is vigilant and double checks an address after copying it. More so, if the address is a long jumble of characters.

EXCHANGE AND IDO ACTIVITY

One of the biggest problems with most exchangers is that they are built in html and PHP, which is very slow to update the transactions. A slow transaction gives a very bad user experience. Many exchangers also use FAKE Bots to generate FAKE trades and give the user the experience of heavy activity on the trading and the also on the IDO LaunchPAD.

AFFILIATE AND NETWORKING

The biggest problem with affiliate and networking also called MLM is trust and transparency within the industry. The industry has seen a lot of projects coming and going over the past year.

NEW USER UNDERSTANDING FOR THE INDUSTRY

The whole crypto space is still very young so the government are still learning and updating the rules and regulation. Many users simply jump in without proper due diligence and end up burning their hard-earned savings. We encounter users on a daily basis, asking us What is Blockchain, what is crypto, What is a wallet, What is Bitcoin, Who owns bitcoin and many more questions...

11. The Solution

The PROLabs ECO-System will offer a complete pool of dApps, products and services.

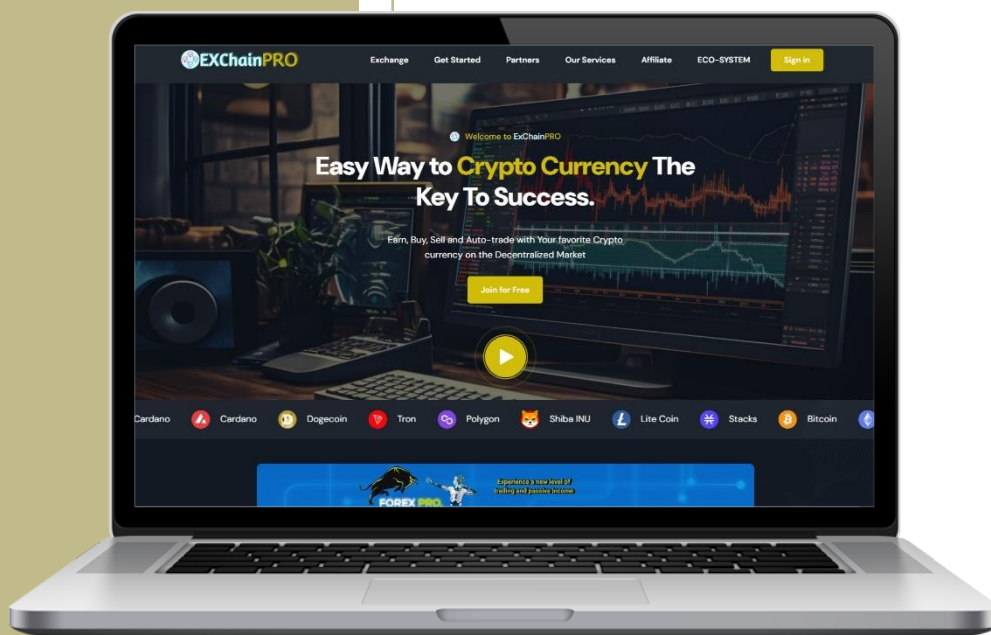

PROLabs

One platform with the cluster of sophisticated dApps. PROLabs aims to mitigate challenges like scalability, transaction processing speed, and security with its robust architecture.

All members are required to register and complete their KYC before getting unhindered access to all of PROLabs' dApps.

PROLabs members will be able to earn rewards from staking, farming, LaunchPAD and trading, each member can without any requirement join the affiliate marketing plan, and earn passive income from the internal share-based system.

- ▶ Security and KYC
- ▶ Education
- ▶ Affiliate and Internal shares
- ▶ C-DEX, IDO/IEO and BOT
- ▶ NFT Marketplace
- ▶ NFT Staking Boosters
- ▶ ESCROW PRO
- ▶ Free Blockchain proposition
- ▶ ShopPRO Tokens
- ▶ SWAP, P2P and Liquidity pools
- ▶ Community and Transparency
- ▶ Credit card Payment

12. Security and KYC

12.1. AML / KYC

We are here to protect our Users from fraudulent and scam activities in the crypto assets sphere. It is possible, that certain crypto assets are used for scam or any other criminal activity, as defined by law. In order to prevent this, it is necessary to take measures to ensure customer verification and security of financial transactions. One of the best measures is AML/KYC procedure, which allows us to confirm, that you are a law-abiding individual or corporation.

Both international and local regulations require PRO Labs to implement effective internal procedures and mechanisms to prevent money laundering, terrorist financing, drug and human trafficking, the proliferation of weapons of mass destruction, corruption and bribery and to take action in case of any form of suspicious activity from its Users.

We Monitoring Transactions and Risk Assessment in line with the international requirements and government to secure a future platform for our users and the regulations.

Free Register

Confirm email and set password and google Authenticator.

Do your KYC if required

You now have full access to the exchange and other applications.

12.2. Account security

Users can create their own account, and activate multiple security settings to secure their account. We are using Google authenticator, email OTP, SMS confirmation, and much more.

13. ACADEMY/EDUCATION

24%

From amongst the respondents of those who own or have a crypto wallet, only 24% claimed to understand the functionalities

9%

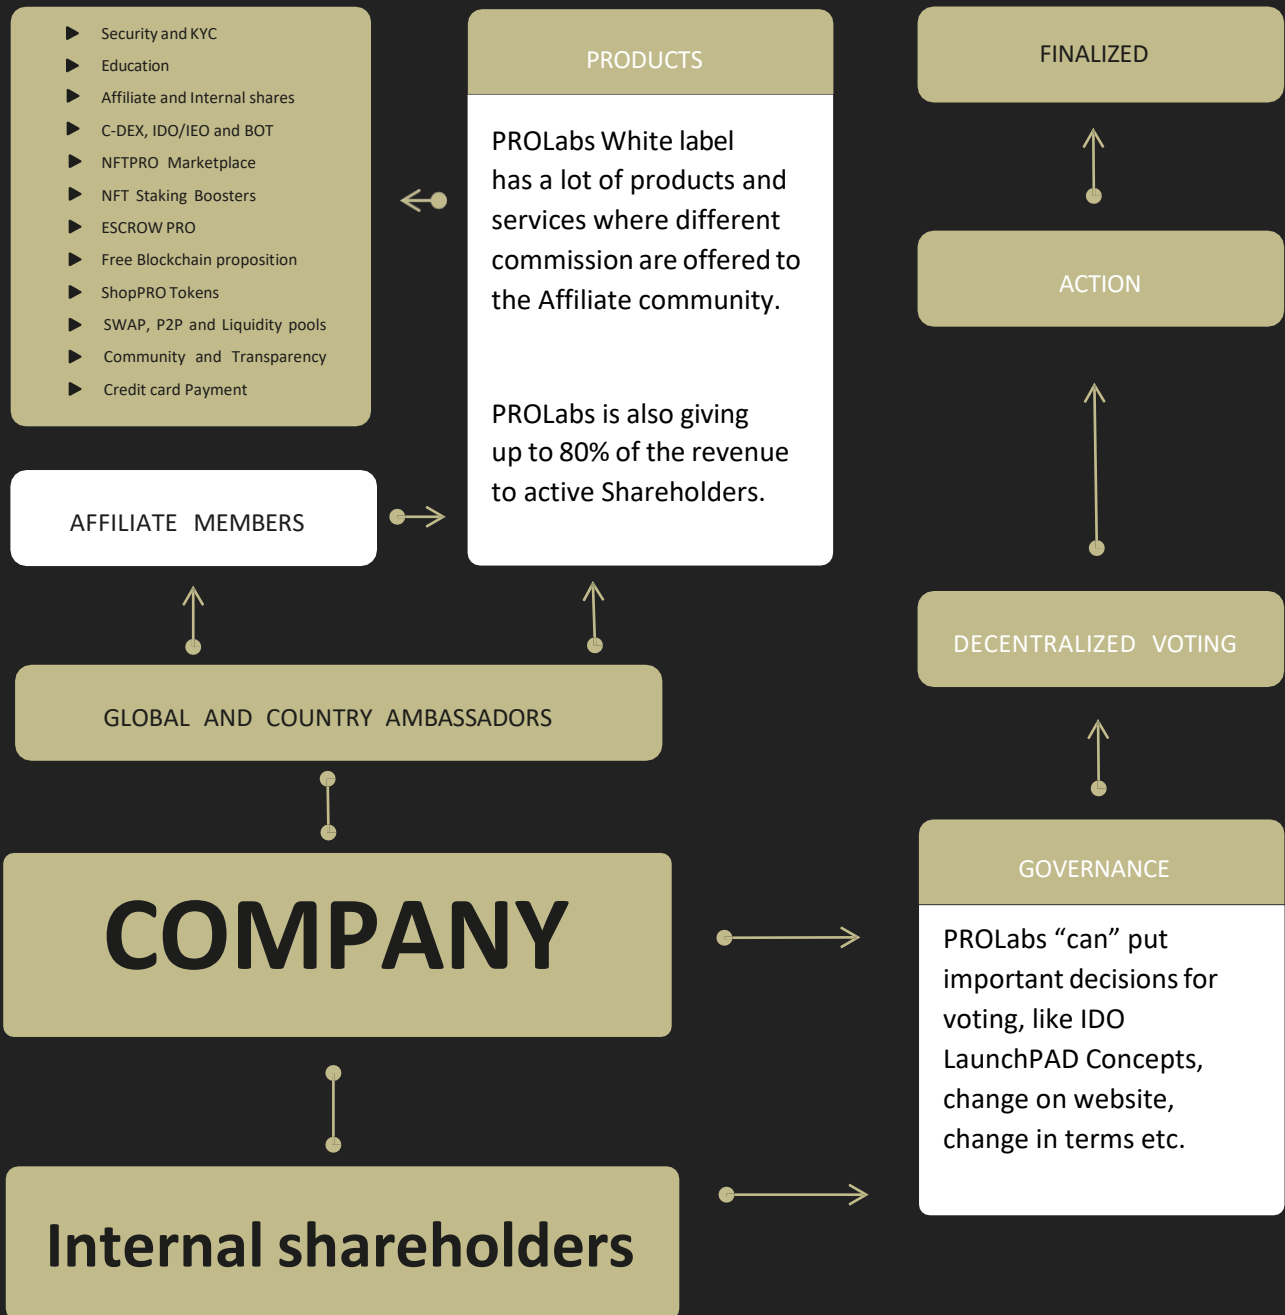

However, 9% of those who own or have owned cryptocurrency said they don't understand how it works at all.

Educate yourself within the crypto space with our Academy

14. Affiliate and Internal shares

The affiliate part of PROLabs includes a White Label system, this is a very important part of the concept; the White Label system helps PROLabs to grow together with new partners.

15. C-DEX, IDO and BOT

On the C-Dex we have some Decentralized product and services, that users can connect to, we also offer BOT

IDO/IEO LaunchPAD

Decentralized

Best Concepts

Fast Transactions

Always Listing

Fast Transaction

Passive trading

Trade with API

Crypto Trading

16. NFT Marketplace

Components

Search with Advanced Options

Easy access to comprehensive information enhances customer satisfaction through swift and effortless searches.

The use of filters

Filters facilitate easy navigation and aid in selecting collectibles NFTs based on type, payment, date, and status.

Trading

NFT marketplace requires bid validity date and status information for buying and selling NFTs.

User Account

Register with email, phone, or social network to sell/buy NFTs; disclose cryptocurrency account. Use decentralized wallet.

Promotions

Simple, eBay-like process specifies NFT details: download, title, price, description, tags, links, etc.

NFT Wallet

Wallet needed to transfer, receive, and store NFTs. Popular wallet integration, supporting NFT protocol like MetaMask and Trust Wallet.

Ratings and reviews

User rating system to gauge platform value. Scale from 1-10. Subscribers leave reviews. Option to cancel.

Promptness

A push notification system will notify users of new bids, status changes, new posts, lots for sale, or NFT platform upgrades in their favorite category or store.

Support

Support services help users locate information, resolve issues/conflicts. May include call center, email, chatbot. Vital for trading platforms.

17. NFT Boosters with Benefits

The PROLABs ecosystem has a number of NFTs with benefits that can be used based on your interests.

What are Boosters?

Boosters can be considered as decentralized financial instruments, or a strategic tool there gives you more benefits and discount based on your needs.

There will be many kinds of booster to choose from:

Each user/wallet will only be allowed to buy 1 booster of each.

NFT SILVER +

- Maximum NFT 10,000
- Max 5 years

Benefits:

- Up to 5 years installment
- X2 ECPRO Staking
- Right to sell after fully paid

\$1000.00

NFT SILVER LIGHT

- Maximum NFT 20,000

Benefits:

- 5 Years SILVER subscription membership
- 20% Discount on future Event ticket
- Priority Lane to event
- Right to sell

\$250.00

NFT Platinum

- Maximum NFT 100
- Max 6 years

Benefits:

- Up to 5 years installment
- X5 ECPRO Staking (can't combine with Silver)
- Right to sell after fully paid

\$11,500.00

NFT GOLD

- Maximum NFT 1000

Benefits:

- 5 Years GOLD subscription membership
- 40% Discount on future Event ticket
- Priority Lane to event
- Right to sell

\$1000.00

Secondary Market:

When all the boosters are sold, the owners of these booster will be allowed to sell their respective boosters for the best price to any other user on the platform, who wishes to buy them.

During the trade of the boosters, the first owner will have to clear any pending dues, according to his installment wise payment plan.

PROLABs will receive 10% Royalty of the total transaction value when the boosters get resold by the owner of the booster/seller of the booster.

18. ESCROW PRO

In a bid to ensure smooth transfer of ownership of the boosters in the secondary market, we would be deploying a third-party smart contract.

This smart contract will be called an Escrow smart contract. It will be coded with a set of instructions, that safeguard personal interests of the buyer of the booster as well as the seller.

The smart contract will enforce trustability, security and efficiently ensure hassle-free transfer of ownership from the seller to the buyer is carried out. At the same time, it ensures that the seller receives the selling amount agreed upon, for the respective boosters.

19. Free Blockchain Proposition

We can onboard global corporations onto our platform, by leveraging GAS-FREE transactions to the users on our platform.

To achieve this, we'll be allowing users to transact on the PROLabs ECO-system as they usually would with any other blockchain. They would also continue to pay for the gas fees as they would on any other blockchain.

The only catch point here is that when they are done with the transactions, we'd airdrop the amount of tokens they spent on paying gas fees.

We ensure this is introduced and capped to a limited period of 12 months from the launch of the platform.

This would provide the platform with the initial upthrust required to pull new users on the platform and explore its offerings.

20. ShopPRO Tokens

Whenever users perform a transaction, or pay the gas fees using ECPRO tokens on the PRO Labs Eco-system, they will be given back ShopPRO tokens as rewards.

The motive of this rewarding is to encourage users to actively use the platform, and its respective services.

The users will be able to use/redeem these tokens on the E-commerce platform to buy coupons from leading brands.

The purpose of giving back ShopPRO tokens is providing the users with added incentives to actively make transactions on the platform.

Burning:

ShopPRO tokens once exchanged for any coupons or offers, will be considered void of any value. So, they'll be burnt by the burning mechanism that will be implemented.

21. SWAP, Loyalty and Liquidity pool

With ExChainPRO Exchange can you easy SWAP, Trade with other users 100% decentralized it's all up to you. Most important is, it can be done with a few clicks.

SWAP

ExChainPRO Exchange is using decentralized swap to give the members an easy way to exchange tokens.

Loyalty

With the Loyalty TIER system you can gain extra rewards by using PRO Labs service and products across the ecosystem.

LIQUIDITY POOL

Companies with own tokens/coin need to add enough liquidity for the requested token pairs. If users Providing liquidity to tokens, they will get ECPRO Tokens in reward.

22. Community and transparency

22.1. Community

We believe that PRO Labs products and services, together with our unique Affiliate White Label system, will create a solid base to support all kinds of distributed applications and ensure its users' digital assets gain, and encourage the growth of the whole PRO Labs ecosystem. PRO Labs holds that, by building a diverse ecosystem that provides multiple services to a wide community of users, it will create activity and build trust at a much higher rate than a single-service player. However, it is clear that a substantial part of successful brand building and community engagement is accommodating and delivering on the expectations of our community members. It is quintessential, to meet the needs of all the affiliates and stakeholders involved with the PRO Labs Eco-System.

22.2. Transparency

It is quintessential for PRO Labs founders that we remain as transparent as possible, to all our members and affiliates.

You can find all you need on our website <https://prolabs.tech> in the footer section. Meet the team here: <https://prolabs.tech/team>

23. Credit card

23.1. Credit card Payment

PROLabs is working together with some of the biggest credit card providers on the market, allowing us to offer credit card and bank payment to our KYC approved members.

23.2. Virtual debit card

PROLabs main goal is to provide the best and easiest withdrawal options for our members. We can therefore offer Virtual credit card to members who subscribing to the VIP subscription and completing the KYC requirement.

23.3. Physical debit card

PROLabs main goal is to provide the best and easiest withdrawal options for our members, we therefore, offer Physical credit cards to our members with the VIP subscription level and have finished their KYC requirement.

Something REAL coming soon here

COMING SOON

Something huge and REAL is coming very soon.

4

CHAPTER 4

PROLabs COMPANY

Welcome to PROLabs team and company.

24. The Company

PROLabs Main office are located in Czech republic

- Legal Name: PROLabs s.r.o
- Company Type: Limited Liability Company
- Identification Number: 197 53 918
- Address: Cimburkova 916/8 zizkov, 130 00 Praha 3
- Issue Date: 10/10/2023 (From 2022 Registered in Dubai)

SCOPE of Business License:

License to trade and services in the field of trade and service mediation and provision of services associated with a virtual asset.

Our office goal is:

- 10 x support staff members in
- 1 x Global Ambassador
- 1 x Global Manager

The Main office in the Philippines Primary job is to support members, crypto client meetings, development and support Country Ambassadors and support smaller offices around the globe.

25. How Company Works

PROLabs believe the golden key to success is transparency, happy members and clients.

Client

PROLabs will join the major Crypto and affiliate events around the world to market the BRAND, and always be on lookout for new client and partner agreement there can benefit the company and the users.

Users

PROLabs want to meet their users and affiliate members, so members of PROLabs are always welcome to visit us at our office, events and EXPO.

Affiliate

PROLabs will have regular Zoom meetings, Face to Face events, to motive and advocate our affiliate within PROLabs Eco-system.

Social Media

Social media is an important part of PROLabs as it helps us grow our business.

26. Internal Shares

PROLabs has 2 kinds of non-refundable internal share, there is used to share up to 80% of the company revenue on a weekly basis. The shares are also used for the governance voting system.

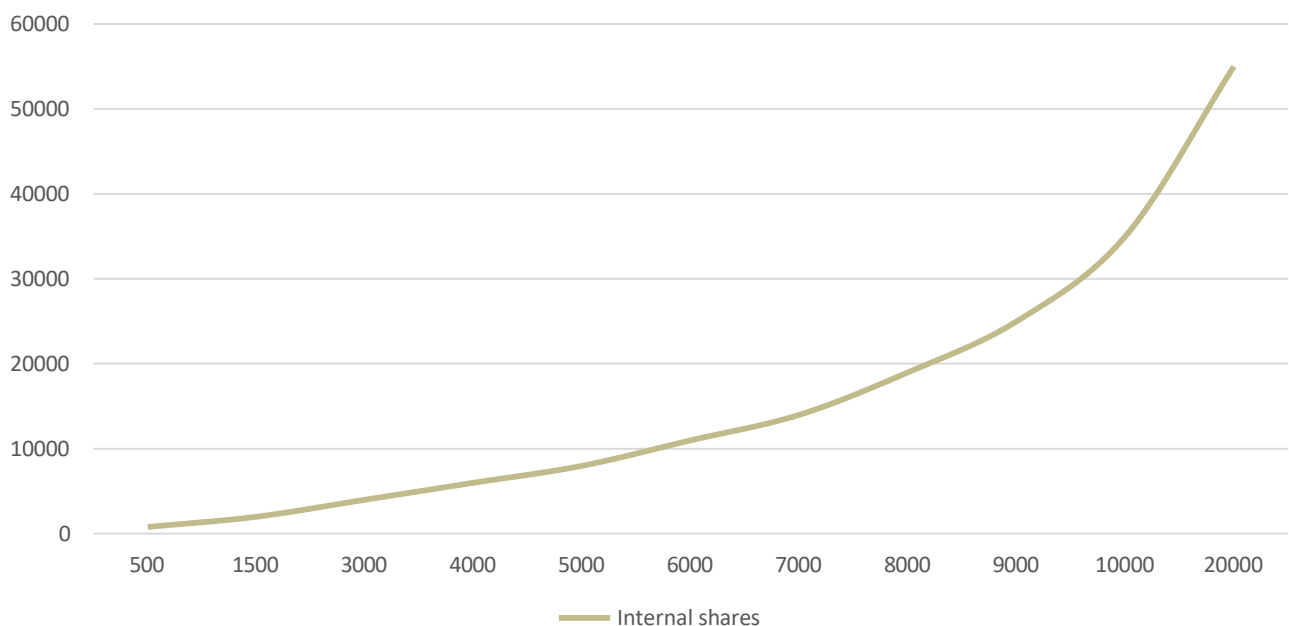

26.1. Equity Internal Share

Affiliates are buying Internal shares from our so called “Equity Share” packages from PROLabs affiliate page. Each Equity Share package holding an amount of internal shares, the more shares you own the more income you will earn from the weekly turnover payout.

26.2. Lotto Internal Share

Members can buy Internal shares from exchainpro.com for each Internal share users buying, they will get a free Decentralized Lotto coupon.

Each share = \$50 are also giving 1 free lotto coupon, where 15% are going to the Jackpot pool and will be drawn every month, the member can't lose, if there is no lucky winner, the coupon continues to the next month.

27. Management Team

Meet Our Team

**Founder and
